How can we support your Patients ?

Psychological assessments and Support

Since 2000, we have provided comprehensive psychological assessments and intervention services for children, adolescents, and adults. We welcome referrals under a GP Mental Health Care Plan (MHCP).

All assessments are conducted by an AHPRA-registered psychologist, with a clinical psychologist's involvement where appropriate. Our approach is guided by DSM-5-TR criteria and current Australian clinical guidelines to support diagnostic clarification and informed management planning.

Reports are structured to provide clear diagnostic impressions where applicable, along with clinically relevant recommendations to support ongoing care and decision-making.

Why refer to BNC?

- We have been providing psychological and behavioural assessments for over two decades.
- All clinicians are appropriately qualified and, where required, registered with AHPRA.
- Our reports are concise, clinically grounded, and tailored to the needs of referring practitioners, supporting practical decision-making and ongoing care.
- Each patient receives a comprehensive written report and a feedback session to discuss outcomes.
- Telehealth assessments are available for suitable patients to increase accessibility.

Examples of our assessment process

ADHD assessments follow current Australian clinical guidelines and include clinical interviews, developmental history, standardised rating scales, and screening for co-morbidities.

Autism assessments are aligned with the Autism CRC National Guidelines and include clinical interviews, behavioural observation, and standardised functional assessment tools. Where indicated, we provide support for NDIS access needs.

All case formulations and diagnostic conclusions are based on DSM-5-TR criteria, with tailored recommendations to support ongoing care and clinical decision-making.

To enquire or refer, please email: ***reception@adhd.com.au*** or call us ***(03) 9848 9100***

Refer a patient to BNC

GPs can refer under a Mental Health Care Plan. Call reception to discuss a referral.
